

Special Issue

Recent Advances in Metals Recovery from Solid and Liquid Wastes

Message from the Guest Editor

We are extremely glad to announce that a Special Issue of Sustainability (ISSN 2071-1050, impact factor 2.576) on “Recent Advances in Metals Recovery from solid and liquid wastes” will be published in 2021. Articles that deal with sustainable recovery of metals (including, but not limited to, critical metals, rare earth elements, platinum group metals and strategic metals) by bio and hydrometallurgy from solid wastes and wastewater, will be considered for this Special Issue. In this special issue “Recent Advances in Metals Recovery from solid and liquid wastes”, we would like to compile review and research articles focusing on sustainable recovery of metals from different wastes (such as WEEE, municipal wastes, mining and metallurgical wastes, industrial wastes, wastewater, mine drainage and tailings, sewage, etc) by biological and chemical processes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
