

Special Issue

Sustainable Architecture: Energy Efficiency in Buildings

Message from the Guest Editors

The global architectural landscape is undergoing a transformative shift towards sustainability, driven by the urgent need to address climate change and enhance environmental stewardship, the global architectural landscape is undergoing a transformative shift towards sustainability. The scientific exploration of energy efficiency in buildings has become imperative, as it not only aligns with environmental goals but also holds the key to creating resilient, energy-efficient urban environments. This Special Issue seeks to explore the frontiers of research within this dynamic field, aiming to unravel innovative solutions, technological advancements, and interdisciplinary approaches that can redefine the future of sustainable architecture. Research areas may include (but are not limited to):

- Innovative architectural design for energy efficiency;
- Renewable energy integration;
- Smart building technologies;
- Advanced building envelope solutions;
- Sustainable materials and construction practices;
- Urban planning for energy efficiency;
- Life cycle assessment in architecture;
- Phase change energy system;
- Sustainable Energy Transition for Existing Buildings.

Guest Editors

Dr. Zhengxuan Liu

Faculty of Architecture and the Built Environment, Delft University of Technology, 2600 GA Delft, The Netherlands

Dr. Yuekuan Zhou

Department of Mechanical and Aerospace Engineering, The Hong Kong University of Science and Technology, Guangzhou 511453, China

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
