

## Special Issue

# Sustainable Tourism Development: Exploring Social and Economic Implications

### Message from the Guest Editors

Within the framework of sustainable tourism, carrying capacity, environmental impact assessment, and ecological footprint phenomenon should be examined. Challenges the sustainable tourism development paradigm have dominated both theoretical and practical approaches to tourism development over the last decades. We should therefore extend sustainable tourism debate beyond the arguably managerialist 'blueprint' and destination-focused approach that continues to characterize even the most recent 'sustainability' agenda within tourism development. Therefore, it is important to reviewing the evolution of the sustainable tourism development concept, its contemporary manifestations in academic literature and policy developments and processes, compares its limitations to prevailing political-economic, socio-cultural and environmental contexts as well the value of historical analysis through careful consideration of motivations, context, and development type under different circumstances.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
