

Special Issue

Mammal Status: Diversity, Abundance and Dynamics Volume II

Message from the Guest Editor

Sustainability is continuing its Special Issue series committed to mammals, a very important group of vertebrates closely related to the functioning of ecosystems and human interests. However, they can also be a source of damage and pathogen vectors and are not always welcomed by societies and stakeholders. As a result of recent climate changes and expansion to the commensal environments, some mammal populations and species are widening their distributions with overabundance in the suboptimal habitats, while the others weary in the remaining suitable habitat patches. Multiple management issues, including (but not limited to) hunting, poaching, uncontrolled trade, and road kills, influence the numbers and distribution of mammal species across all continents. Continuing with the topic of mammals as a Special Issue, we endeavor to focus on investigations of mammal management and acceptance. Original research articles, reviews and opinions are welcome. Research areas may include (but are not limited to): mammalian ecology, population management and use, conservation, mammal damage and threats to human safety, long-term monitoring, and other mammal-related issues.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
