## **Special Issue**

# Marine Pollution and Ecological Environment

## Message from the Guest Editors

The study of ecotoxicology tries to understand the intimate interactions between toxic compounds and sentinel species, either individually or as assemblages. Other research focuses on the deleterious impacts of these compounds on marine fauna at the community level, highlighting the multiple interactions among species, their habitats and the compounds of interest. In most cases, ecotoxicology differs from classical toxicological studies by approaching these complicated interactions through an interdisciplinary approach, based on state-of-the-art chemical, biochemical (e.g., use of genetic markers), physical (e.g., understanding the structure of the compound of interest for a better understanding of how it interacts at a cellular or molecular level), and ecophysiological (e.g., consumption of growth rate) analyses. The current Special Issue aims to present a collection of papers emphasizing the latest advances in understanding the way that different compounds are inadvertently or purposefully released into marine habitats, and their effect on the diversity and the biology of various taxonomic groups.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
