# Sustainable Maritime Communications Network Development

### Message from the Guest Editors

1. Land-based Data Communication Networks are continually making progress. Regarding Maritime Communications, however, remaining problems include slow communication speeds and limited communication capacity. 2. Journals related to electrical and electronic communication engineering (IEEE, etc.) and journals related to marine engineering (JMST) cover topics such as specific technological development. However, since such information is rarely provided having a viewpoint of maritime communication networks, we believe that they will be effectively complemented in a timely manner.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
