

Special Issue

Advanced in Market Economy and Industrial Policy

Message from the Guest Editors

The Special Issue focuses on the idea of new production and industrial paradigm based on sustainability in terms of the choice of materials and the redesign of the supply chains, in order to make them more and more circular in maintaining high quality. It also concerns innovation in a 4.0 key in sectors that represent a hub for a digital and sustainable transition. Submitted works should focus on rational design based on eco-design principles and the study of impacts along the life cycle of products; experimentation with new materials and processes and the optimization of industrial symbiosis models capable of overcoming the logic of recycling; and the development and application of technological innovations to identify new resources, and to enhance existing ones, including waste. The development of new strategies requires the adoption of enabling technologies, such as industrial biotechnologies, green chemistry, additive manufacturing, and the Internet of Things, which make it possible to completely rethink supply chains in terms of environmental and socio-economic sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
