New Insights into the Study of the Ethical-Sustainable Principles Inherent in Islamic Banking and Finance

Message from the Guest Editors

In today's world, the Islamic Banking and Finance area is becoming increasingly important. If we consider some figures, more than 20% of the world's population consider themselves part of the Muslim religion, while the total investment in this field today exceeds USD 2.5 trillion. This particular approach to sustainable finance is based on ethical positions that are markedly different from those of conventional finance, based, among other precepts, on risk sharing, respect for the environment and non-exploitation of man by her/his fellows. Despite the importance of Islamic banking and finance and the multiple lines of research it offers from its ethical-moral and sustainable perspectives, the methodological insights that have studied it have generally been rather reiterative, hence the need to apply new approaches to this discipline in line with its enormous potential, which is the primary objective of this Special Issue. This Special Issue represents an incredible opportunity for Islamic banking and finance to be popularized among scholars around the world, in clear correspondence with the importance of this area of knowledge.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
