

Special Issue

Mergers and Acquisitions Processes and Sustainability

Message from the Guest Editors

This Special Issue will focus on the study of mergers and acquisitions processes. This field of study has attracted great attention from both business leaders and scholars in different disciplines over the last years. There is an increased recognition of the relevance of the adoption and management of the most suitable mergers and acquisitions processes, especially in today's globalized world. In addition, current and traditional literature on these processes acknowledge the role of sustainability as a prerequisite for success. Accordingly, the aim of this Special Issue is to shed fresh insights on sustainability factors in Mergers and Acquisitions Processes. Certainly, there is currently a large body of research on this topic, but it seems obvious that further efforts are still necessary to obtain a better understanding on the phenomenon under study. Studies that conduct critical theoretical analysis, comparative observation, empirical testing, qualitative methodology, case study findings and longitudinal case investigations relating to the Special Issue are particularly encouraged and welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
