

Special Issue

Migrant Health and Quality of Life

Message from the Guest Editor

Feelings of displacement and poor quality of life—including physically, socially, psychologically—are particularly heightened for migrant communities, especially at a time when the world is grappling with a global pandemic. With about one billion people on the move globally—many of whom are impacted by the devastating effects of the COVID-19 pandemic—and increased mental health diagnoses within many migrant communities since the onset of the COVID-19 pandemic, there is a need to build research capacity in addressing the health needs of socially disadvantaged migrant populations globally. There are reasons to believe that these health and quality of life concerns may have worsened for migrants due to their loss of resources during the COVID-19 pandemic, and the changes that followed this loss. This special issue is an opportunity to provide a solid and enduring foundation to the establishment of a new critical mass in the field of migrant health and quality of life, with a commitment to influence policy and practice.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
