

## Special Issue

# Urban Pollution, Health Impacts, and Mitigation Strategies

### Message from the Guest Editor

This Special Issue focuses on the health impacts of urban emissions and potential mitigation strategies. As more than half of the world's population now lives in urban centers, and this number is projected to increase rapidly, the health of city dwellers is becoming a significant concern. Most cities are also large sources of pollutants, of varying degrees of toxicity, and the accounting of emissions, exposure modeling, and mitigation strategies is a significant area of study. Topics for this Special Issue include urban emissions quantification and reduction studies, as well pollutant observation and health impact projects. Multi-disciplinary work is strongly encouraged as an objective of this Special Issue is to highlight enactable policy solutions and further research avenues. Furthermore, studies that highlight the interplay between urban pollution and health outcomes are particularly welcome. Keywords:

- Urban Pollution
- Health Impacts
- Mitigation Strategies
- Health Modeling
- Urban Development

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
