

Special Issue

Mobile Communications and Novel Business Models

Message from the Guest Editors

With the introduction and deployment of the 5th generation mobile communications technologies (5G), businesses are underway a disruption not only from technological perspective, but especially from the business and related regulative perspectives. This special issue is multidisciplinary in nature and seeks to publish conceptual, theoretical and empirical studies that consider the interrelated business, regulation and/or technology aspects of mobile communication networks. Contributions can for example utilize the business model and ecosystem concepts as approaches to explore the mobile businesses, address regulations related challenges, or look into the deployment of mobile networks from techno-economic perspectives. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
