

Special Issue

Monetary and Financial Sustainability in a Post COVID-19 World

Message from the Guest Editors

This Special Issue is dedicated to the sustainability issues related to our current monetary and financial system in a post COVID-19 world. Contributions to the Special Issue will examine the sustainability of government finances, the banking sector, the financial system at large, and price-stability policies, as well as alternative monetary systems, such as cryptocurrencies, and their sustainability. In this respect, it is important to examine the effects a monetary system may have on the environment in the form of business cycles, resource costs, and, particularly in the case of cryptocurrencies, energy costs. Contributions may also investigate the sustainability of monetary systems via case studies analyzing past crises and their social and cultural consequences. Articles may also approach the topic from an ethical point of view. More details at: https://www.mdpi.com/journal/sustainability/special_issues/Monetary_Financial

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
