# Multiple Criteria Decision Analysis in Energy Renewable Projects for Sustainable Development

### Message from the Guest Editors

The environmental consequences of the high demand for fossil fuels have led governments to adopt policies that encourage the introduction of renewable and sustainable energy projects. The selection among several renewable energy investment projects or different exploitation of sustainable renewable energy is a laborious task. This is because the decision maker must deal with multiple factors before selecting the most viable alternative. Due to the complex and multidimensional characteristic of social, biological, and physical systems, the use of multicriteria decision analysis models (MCDA) has been particularly effective.

### Guest Editors

Prof. Dr. Cristina Alonso-Tristán

Prof. Dr. Roberto Ribas

Dr. Andrés Suárez

Prof. Elena Arce

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
