

## Special Issue

# Resilient Cities Under Climate Changes

### Message from the Guest Editors

This Special Issue focuses on advancing knowledge and practice in building urban resilience to climate change. It emphasizes interdisciplinary approaches that integrate urban planning, environmental science, engineering, and social equity to address escalating climate risks such as extreme heat, flooding, drought, and sea-level rise. Contributions are encouraged to examine post-event recovery experiences, innovative climate-resilient infrastructure, and strategies to ensure vulnerable populations are not left behind. By showcasing diverse geographic and socio-economic contexts, this collection aims to inspire transformative solutions that both reduce current vulnerabilities and prepare cities for uncertain futures. Ultimately, it aspires to advance sustainable, inclusive, and proactive resilience practices in urban environments worldwide.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
