Sustainable Transition in Green Maritime Transportation and Port Management

Message from the Guest Editors

Sustainable transition in maritime transportation and port management is the process of transitioning from traditional methods of maritime transportation and port management to more sustainable and environmentally friendly practices. This includes utilizing renewable energy sources, such as wind and solar power and adopting green technologies, such as electric and hybrid vessels. Furthermore, it necessitates the implementation of sustainable practices, such as waste management, energy efficiency, and emissions reduction. The aim is to reduce the environmental impact of maritime transportation and port management while still ensuring the efficient and safe movement of goods and people by sea, thus facilitating the progression of society toward a more sustainable future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
