

## Special Issue

# Observation and Modeling of Air Pollution

### Message from the Guest Editors

A Special Issue named “Observation and Management of Aerosols and Gaseous Air Pollution” has been proposed to launch soon under the journal *Sustainability*. The Issue will broadly but precisely cover the topic of interest in aerosol and volatile compositions in air pollution. Aerosols, their compositions, and volatile gases appropriately indicate the quality of air and possible health damage in the source locations. This Special Issue will reach out to the authors interested in air quality measurement and modeling. This Issue will also be a unique platform for the potential authors and readers as there is no existing literature journal that precisely addresses the size of aerosol and gas compositions and modeling

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
