

Special Issue

Integrating Ecosystem Services into Landscape Planning for Sustainable Development

Message from the Guest Editors

This Special Issue explores the role of ecosystem services (ESs) in landscape planning, aiming to promote sustainable development and enhance environmental resilience. The necessity of integrating ecological, social, and economic approaches in land management decision-making processes is highlighted in this collection. The primary aim is to develop planning and management models that enhance the adaptive capacity of landscapes to climate change, protect biodiversity, and ensure the sustainable management of resources and collective well-being. From a systemic and collaborative standpoint, this Issue aims to contribute to the scientific and socio-administrative debate on how to make territories more sustainable, equitable, and resilient in the face of contemporary environmental and social challenges. Authors are invited to submit interdisciplinary contributions that include innovative methodologies, application tools, and relevant case studies with the potential to influence sustainability-oriented strategic choices. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
