Special Issue

Strategic and Operational Decisions in a Multiple-Channel Supply Chain

Message from the Guest Editors

While enhancing the resilience of their supply chains, firms have been encountering a severe issue, that is, geopolitical risk. To deal with this risk, a multiplechannel supply chain can be a significant strategy. However, building an appropriate multiple-channel supply chain involves a variety of perspectives. Thus, this Special Issue aims to demonstrate how to formulate a strategic decision in a multiple-level supply chain. This Special Issue calls for submissions on various theoretical lenses and methodologies which can overcome the challenges and present new ground providing the formulation of the future development of the issue. Therefore, the studies would be expected to help to advance theories and put theories into practical usage for firms. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Multiple-channel supply chains:
- Channel architecture:
- Channel coordination;
- Multichannel operation:
- Geographic risk:
- Supply chain resilience;
- Decision model:
- Distribution channel:
- Supply chain vulnerability;
- Digital supply chain network

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
