

Special Issue

Evaluation and Utilization of Renewable Energy for Sustainable Development

Message from the Guest Editor

Energy production and consumption are deeply coupled to environmental problems such as climate and pollution problems, responsible for many health problems and a decrease in life quality. The social dimension of energy does not end with the abovementioned associated problems, it goes beyond them since energy assures food provision, heating and cooling, mobility, etc., and all of these issues are fundamental to a high standard of living. From an economic point view, energy is also a crucial factor affecting countries' economies in a very strong way. Energy clearly impacts the pillars of Sustainable Development, a keystone to achieve it. The use of renewable energy, hydropower, photovoltaics, wind, geothermal, etc., emerge as an important solution to implement Sustainable Development, since it can reduce environmental impacts, provide countries with more resilience as their external energy dependency decreases, and also enhance the social performance of the energy sector. This Special Issue welcomes original research articles and reviews related to evaluation and utilization of renewable energy for sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
