

Special Issue

Planning and Sustainable Management of Irrigation in Agricultural Operations

Message from the Guest Editors

Non-sustainable irrigation practices can lead to environmental degradation, water scarcity, and food insecurity. Therefore, planning and sustainable management of irrigation are essential to ensure the efficient use of water resources, preserve the environment, and enhance agricultural productivity. This Special Issue aims to provide the professional and research community with articles that cover different aspects of sustainable management of irrigation, including precision irrigation and conservation practices using sensors and artificial intelligence techniques. In this Special Issue, original research articles and reviews are welcome. Research areas may include the following:

Irrigation scheduling;

Smart agriculture;

Irrigation system;

Irrigation and drainage management;

Sustainable agriculture;

Water use efficiency;

Agricultural water management;

Precision irrigation;

Climate change;

Field production;

Controlled environment agriculture. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
