

## Special Issue

# Strategies for Sustainable STEM Education

### Message from the Guest Editors

One of the main sectors that significantly affects sustainable development is STEM education. This Special Issue focuses on food manufacturing and production and cleanliness to solve these problems. The construction of strategic experience practices on topics such as the development of water resources, the development of clean energy, and global climate change caused by environmental pollution focuses on the challenges and opportunities of sustainability. The goal is to provide insights and suggestions to policymakers, education researchers, and those interested in sustainable development to support the plans for sustainable development and STEM education. We welcome submissions on topics including but not limited to:

- Developments in the field of food manufacturing and production
- Clean water development
- Innovation in the development of industries that rely on clean energy
- The design and planning of solutions to tackle environmental pollution
- Global climate change solution design and planning
- Strategic planning for the integration of STEM at all levels of the education system
- The design and planning of sustainable entrepreneurship strategies

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
