

Special Issue

Building Resilient Supply Chains for Sustainable Construction

Message from the Guest Editors

The construction sector is undergoing a transformative shift towards more sustainable practices, driven by growing environmental concerns, stricter regulations, and technological advancements. However, one of the most significant challenges facing the industry is the resilience of its supply chains, which are often vulnerable to disruptions caused by external factors like climate change, economic fluctuations, and global pandemics. Building resilient supply chains is crucial to ensuring the steady flow of materials and resources while maintaining sustainability commitments and minimising environmental impact. This Special Issue aims to explore the intersection of supply chain resilience and sustainability in the construction sector. It aligns with the journal's focus on advancing sustainable development practices by examining innovative strategies and solutions for strengthening resilience in construction supply chains. By fostering interdisciplinary dialogue, this Issue will provide insights into how digital technologies, circular economy principles, and green procurement can create supply chains that are both sustainable and adaptable to unforeseen challenges.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
