

Special Issue

Circular Economy, Environmental Management and Sustainability

Message from the Guest Editors

Accelerating the transition to a circular economy demands more than policy commitment: it requires rigorous evidence-based science that connects systemic innovation to measurable sustainability outcomes. Fragmented governance frameworks, insufficient empirical evidence on systemic transitions, and the limited integration of environmental management systems into circular business models continue to constrain progress toward meaningful sustainability performance. This Special Issue, *Circular economy, environmental management and sustainability*, will address these gaps by providing a rigorous scientific platform for interdisciplinary research that bridges theoretical frameworks with applied, evidence-based practice. We welcome empirical studies that demonstrate quantifiable environmental, economic, and social benefits, as well as comparative analyses across sectors, geographies, and institutional contexts. We encourage the submission of research that connects circular strategies to biodiversity outcomes, ESG frameworks and climate neutrality pathways.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
