## **Special Issue**

# Innovations in Sustainable Food Processing Technologies

## Message from the Guest Editors

The food industry faces the dual challenge of ensuring global food security while minimizing environmental impacts. This Special Issue focuses on innovative, sustainable food processing technologies that enhance food quality, safety, and shelf life while addressing energy efficiency, waste reduction, and resource conservation. Topics include advancements in nonthermal processing (e.g., high-pressure processing, pulsed electric fields), energy-efficient drying methods, circular economy approaches for waste valorization, and the development of biodegradable and edible packaging solutions. Emerging technologies such as nanotechnology, Al-driven food processing, enzymeassisted processing, and precision fermentation are particularly welcome. This Special Issue aims to provide a platform for interdisciplinary research and practical solutions that promote sustainability across the food supply chain and support environmental and economic goals.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

## **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
