

Special Issue

Sustainability in the Maritime Transport Research and Port Logistics

Message from the Guest Editors

Considering the challenges of leading international bodies to make shipping a zero-emission industry, sustainability issues in maritime transport and ports have become the focal points of recent regulations, policies, initiatives, and other available mechanisms. The specific objective of this Special Issue is to expand scientific research in complex and dynamic industries by addressing the appropriate sustainable development issues of maritime transport and port logistics.

- sustainable maritime transport and logistics
- green port management and operations
- optimization of maritime routes and green corridors
- enhancing the energy efficiency
- decarbonization of maritime transport and ports
- a novel methodology for sustainable development
- external costs of transport
- alternative fuels and policy recommendations
- technologies and innovations in maritime and port business
- case studies of decarbonization in the maritime sector
- challenges and obstacles to sustainable development in maritime transport
- the sustainability of transport logistics chains

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
