

## Special Issue

# Sustainable Nanoporous Materials

### Message from the Guest Editor

This Special Issue aims to provide a comprehensive platform that presents various aspects of the design, development, and application of nanoporous materials towards sustainability. We are interested in covering original research articles, review articles, and perspectives relevant to the field of nanoporous materials. Submissions to this Special Issue should be written from a materials science, chemistry, and engineering stand point and can be computational, theoretical, or experimental studies. Potential topics include but are not limited to:

- Computational studies, synthesis and characterization of novel nanoporous materials;
- Design, development, and application of nanoporous materials for environmental protection and remediation.
- Design, development, and application of nanoporous materials for medical and biological applications.
- Novel applications of nanoporous materials and their contributions to sustainable development.

### Guest Editor

Dr. Anandram Venkatasubramanian

Department of Biomedical Engineering, University of Michigan, Ann Arbor, MI, USA

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
