Natural Resource Management for Green Growth in Developing Countries

Message from the Guest Editors

Natural resource management (both renewable and nonrenewable) has a long tradition in many disciplines. The perspectives have varied over time and between disciplines. For a long time, a major concern was the risk of depletion of nonrenewable resources. However, more recently, sustainable development has been replaced by “green growth” in many policies following a series of flagship reports by the World Bank, OECD, UNEP, etc. Finally, this has made various ministries of finance around the world recognize the green agenda. Examples of such applications include but are not limited to:

- Devolved forest management balancing profitability and environmental concerns;
- Highly productive and sustainable catch fisheries and aquaculture;
- High-yielding sustainable agriculture;
- Profitable and sustainable ecotourism benefiting local stakeholders;
- Profitable mining (large- or small-scale) with limited negative environmental and social impacts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
