

Special Issue

Navigation and Remote Sensing for Sustainable Development

Message from the Guest Editors

Sustainable environments reflect effective resource management, including the natural environment of the land, water, and air, or the urban environment of buildings, cities, and infrastructure. Sustainability is critical for the human population, not only this generation but also for the generations to come. The transformation from traditional to sustainable environments requires interdisciplinary approaches in order to integrate knowledge and technologies, as well as examine, explore, and critically engage with issues and advances of urban environments. Research challenges in this field range from calibration, data acquisition, fusion, and modelling to efficient information extraction, visualization, and mapping. Therefore, the scope of this Special Issue covers research areas such as multi-sensor integration for sustainable urban environments, remote sensing for urban sustainability, and 3D city modelling, among others.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
