

Special Issue

Network Management for Sustainable Internet of Things

Message from the Guest Editors

Advancements in information communication and technologies have facilitated various cutting-edge applications. Various applications have emerged, including those in healthcare, industry, transportation, smart grids, and smart cities. However, efforts need to be made in providing sustainable ecosystems for these Internet of Things-enabled cyber-physical systems (CPS). Such developments can occur with improved coordination between computational and physical elements via efficient network management. The purpose of this Special Issue is to bring together the most recent and advanced research on subjects including the sustainable Internet of Things, opportunistic computing, and semantic-enabled systems, where devices, agents, and humans interact—all with a focus on settings utilizing a sustainable Internet of Things. Future Internet architectures, software-defined networks, and edge-computing-based technologies for smart manufacturing, supply chain management, collaboration, and co-design are also welcome, as are innovative applications and case studies. Despite so many applications and solutions, there remain many challenges at various levels that need to be addressed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
