

Special Issue

New Food Waste Horizons

Message from the Guest Editors

At present, both academia and food industry emphasize the necessity to combat food waste and losses throughout the food supply chain. To perform such a task, scientific manuscripts, various stakeholders, and good environmental practices show a variety of different approaches. To be in line with Sustainable Development Goals (SDGs) by 2030, a good approach is to provide an overview of different case studies. The aims and the scope of this Special Issue are to attract research papers related to various scenarios in decreasing food waste throughout the food supply chain perspective, both top-down and bottom-up and to especially welcome case studies and review articles that describe the current state of the art dealing with food waste. Potential topics include but are not limited to the following:

- Food waste mitigation scenarios;
- Food waste case studies;
- New approaches in processing food waste;
- Models for quantifying food waste value chain;
- Food waste and losses and UN SDGs;
- Food waste–food security–food hunger nexus;
- Sustainable diets and food waste;
- Food waste and sustainable production;
- Food and environmental law in decreasing food waste.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
