Special Issue

The New Paradigm of Waste Management: Waste as Resources

Message from the Guest Editor

This Special Issue focuses on all the efforts in research being made to change the classical paradigm of waste management, aimed to get rid of them or recovering a minimal profit. All the works where wastes are raw sources to obtain new or existing products by means of physical, chemical or biological processes are welcome. Works only focused on composting or anaerobic digestion are discouraged, unless these technologies have a minor or secondary role. The Special Issue is aimed at covering all type of wastes, from urban and industrial sources.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
