

Special Issue

New Conceptual and Empirical Approaches to Sustainability and Competitiveness in the Field of Tourist Destinations

Message from the Guest Editors

Destination marketing and management is a research topic that has been given more importance for more than 20 years. However, more research is needed to address the relationship between tourism, sustainability, and competitiveness. In-depth studies of sustainability from a multidimensional point of view and its effects on tourism competitiveness are essential. In particular, sustainability refers to the need to preserve limited resources for the future (Garrigos-Simon, Narangajavana-Kaosiri, and Narangajavana, 2019), while tourist destinations should be considered a mixture or combination of products, services, and experiences offered by a specific area or region (Buhalis, 2000). The adoption of information communication technologies (ICT) by destinations can lead to more sustainable tourism. The implementation of these technologies by tourist destinations. We kindly invite you to submit your papers to this Special Issue before 30 July 2021.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
