Special Issue

Non-violence and Sustainability: An Important Combination for Achieving the Objectives of the 2030 Agenda?

Message from the Guest Editors

Non-violence and sustainability are in mutual interaction. With the signing of the 2030 Agenda for Sustainable Development, sustainability has taken on a precise, articulated and complex meaning with the aim of transforming the current situation towards an individual-friendly change. The 2030 Agenda commits governments, civil society, and individuals towards a new model of sustainable development, pointing out 17 objectives, 169 targets, and 240 indicators. Non-violent methods can therefore be a valid support for the achievement of these objectives, aiming in particular at respecting spaces, indigenous cultures, natural resources, and countering war policies that lead to unacceptable living standards for large sections of the population.

This Special Issue of Sustainability offers a platform aimed at advancing the understanding of non-violent theory and practice with regard to Agenda 2030 objectives. Researchers and practitioners are encouraged to submit original research articles, case studies, reviews, critical perspectives, and viewpoint articles specifically on the aforementioned elements.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
