# Approaches to the Non-conflictual Use of Resources

### Message from the Guest Editors

Natural resources are the material, energetic, and spatial basis of our standard of living. However, disputes over the ownership, use, and extraction of natural resources often play a disruptive role in peace and security (Brown & Keating, 2015). Several types of natural resources, such as metals and industrial minerals, are reaching their availability limits due to an increase in the world's population and global prosperity. However, resources such as forests, water, pastures, and land might be subject to competitive usage claims. Resource scarcity is recognized to be one of the greatest structural risks for differences or conflicts in the 21st century, and resource use is changing ecosystems, often permanently. The United Nations (2012) promoted the strengthening of the capacity for conflict-sensitive natural resource management in order to promote and support the non-conflictual use of resources.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
