

Special Issue

Sustainability and Life cycle Assessment of Novel Structural Building Skins

Message from the Guest Editors

This Special Issue comprises selected papers from the Working Group “Sustainability and Life cycle Assessment of Novel Structural Membrane Skins” in the EU-COST Action TU1303 “Novel Structural Skins” (2013–2017). The Working Group focused on searching for the most effective life-cycle-based design methodology, to support designers during their daily work, and on studies that combined the necessity of increasing the designers’ awareness of both lightweight and flexible materials and their building physic performances from a life-cycle perspective, achieving membrane architectures with a smaller environmental footprint. The discussed research need actually originates from the networking between researchers and firms—both manufacturers tensile/pneumatic structures and membrane/foil producers—as well as engineers and architects, who are all seeking to find an easier way to compare the eco-profile of lightweight material alternatives that are currently available on the global market.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
