

## Special Issue

# Environmental Monitoring, Ecological Remediation and the Sustainable Future of Humanity

### Message from the Guest Editor

Realizing sustainable development for the entirety of society requires full-process and multi-domain cooperation and participation, with environmental monitoring and ecological restoration being important components. Carrying out environmental monitoring and assessment is a prerequisite for effectively solving environmental problems. Through the collection, analysis, and interpretation of environmental monitoring data, people can understand the current situation and changing trends of various environmental indicators.

This not only provides a scientific basis for the formulation of environmental protection policies but also helps to promote the rational utilization of resources and the development of environmental protection technologies. This Special Issue will publish high-quality papers, outlining the theoretical and/or practical aspects of integrating environmental monitoring and ecological restoration into sustainable development in society.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
