

Special Issue

Advanced, Digital, Sustainable Entrepreneurship and Innovation Management

Message from the Guest Editors

The deployment of digital technologies, such as big-data, AI, and deep learning, to complement sustainability has proven to be a winning combination in innovation that has resulted in some of the most well-established entities around the world. Exploring further, one can find numerous highly advanced digital applications for entrepreneurial innovations in areas such as economic sustainability, social sustainability, energy sustainability, financial sustainability, agriculture sustainability, etc. The objective of this Special Issue is to present articles that provide a comprehensive overview of existing research, as well as case studies on the management aspects of such innovations and applications by examining specific companies and policies in both advanced and emerging countries, in order to see what the key drivers and challenges are in value creation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
