

Special Issue

Building Information Modeling and Technology Applications in Construction

Message from the Guest Editors

The construction industry is experiencing a transformative shift driven by the integration of advanced technologies and methodologies such as Building Information Modeling (BIM) to enhance building performance, particularly, in terms of efficiency, sustainability, and collaboration across all lifecycle phases of construction projects. In this Special Issue, we encourage submissions covering a wide range of topics related to BIM and technology applications in construction, including but not limited to the following:

- Integration of BIM with other advanced technologies such as the Internet of Things (IoT), augmented reality (AR), virtual reality (VR), artificial intelligence (AI), and blockchain;
- BIM for sustainability and green building practices;
- Cost and time optimization using BIM;
- BIM in design and collaborative practices;
- Digital twins and smart construction;
- Regulatory and standardization aspects in promoting BIM adoption;
- Successful BIM implementations and adoption in construction projects;
- Challenges and future directions.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
