

Special Issue

Green Energy Economic Management

Message from the Guest Editor

This Special Issue aims to focus on sustainable issues in the energy sector, especially economic management issues related to renewable energy and power systems. This issue encourages the publication of papers on any aspect and scale of green energy production or utilization technology to contribute to sustainable human development. The main focus is the prediction of renewable energy indicators, including prices, power, rates, etc. This also includes but is not limited to carbon capture and energy storage, wind energy, bioenergy, solar energy, photovoltaics, and traditional fuels. In addition, system analysis, environmental issues, energy conversion, and utilization issues will also be included.

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
