

Special Issue

Sustainable Urban Planning: Management and Uses of Water from a Historical Perspective

Message from the Guest Editor

Sustainable urban planning related to water and its uses is crucial in supporting global and local development addressed from a holistic perspective including long-term analysis. Population growth is affected by long cycles of economic activity, both determine water consumption. Currently, we regard water as a basic resource for human life, which must be managed as a scarce commodity with increasing value to cope with the most important and urgent challenges such as environmental protection. Therefore, it is in the common interest to ensure its sustainable development in an increasingly urban world.

This Special Issue aims to extend the current body of knowledge by presenting the latest integral insights in the field of sustainable urban planning according to management and the uses of water from a historical perspective. Research areas may include the following, considering long-term perspectives: Economy, land use policies, and the legal regime of land and water; Water supply to cities, agriculture, industry, or other uses; Heritage, architecture, engineering, and hydraulic structures;

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
