

## Special Issue

# A Quantitative Analysis and Interdisciplinary Approach to the Sustainable Development Goals

### Message from the Guest Editors

This Special Issue uses a quantitative, interdisciplinary approach to assess global progress on the UN Sustainable Development Goals (SDGs). Integrating methods from economics, engineering, environmental science, and policy, it examines synergies and trade-offs among the 17 goals. Through advanced modeling, it evaluates implementation effectiveness, identifies structural barriers, and maps key success factors. The findings offer evidence-based recommendations to inform decision-makers and support more integrated, resilient development strategies.

### Guest Editors

Prof. Dr. Idiano D'Adamo

Prof. Massimo Gastaldi

Prof. Dr. Vincenzo Stornelli

### Deadline for manuscript submissions

30 September 2025

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
