Special Issue

A Quantitative Analysis and Interdisciplinary Approach to the Sustainable Development Goals

Message from the Guest Editors

This Special Issue uses a quantitative, interdisciplinary approach to assess global progress on the UN Sustainable Development Goals (SDGs). Integrating methods from economics, engineering, environmental science, and policy, it examines synergies and tradeoffs among the 17 goals. Through advanced modeling, it evaluates implementation effectiveness, identifies structural barriers, and maps key success factors. The findings offer evidence-based recommendations to inform decision-makers and support more integrated, resilient development strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
