# Special Issue

# **Environmental Sustainability Through Innovative Biomass** Waste Treatment and **Degradation Strategies**

# Message from the Guest Editors

Biomass waste, such as straw biomass, sewage sludge. food waste, etc., is an important renewable biomass resource, which has the potential to be converted into biofuels for use in the case of energy shortage and for the sake of environmental sustainability. From the perspectives of environmental sustainability and the circular economy, the transformation of biomass waste for biofuels or even valuable products has gained particular attention. However, due to the extremely complex and resistant rigid structure of biomass waste, the hydrolysis of lignocellulose has always been the bottleneck in sustainable resource utilization. This Special Issue aims to highlight innovative treatment and degradation strategies for the conversion of various biomass waste into biofuels and bioenergy. In this Special Issue, original research articles and reviews are welcome. Research areas may include (not limited to) the following subjects: 1.Biological waste treatment and resource recovery; 2. Biofuels and biorefineries; 3. Microbial bioprocesses and products;

4. Thermochemical processes for lignocellulose and algal biomass; 5. Novel pretreatment technologies.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
