# Industrial Design and Production Engineering for Sustainability

### Message from the Guest Editors

Huge emissions of carbon dioxide have resulted in climate change, which is a worldwide phenomenon with transnational dimensions. Everyday life is affected by extreme weather related to climate change. Although the effects are different from region to region, common measures are possible, and the accumulated experience is useful. Awareness of sustainability and circularity issues and the need for change in the industry has never been higher. Innovation, in terms of new kinds of production processes, physical management resources (e.g., new machines or robots), chemistry, materials, production and applications outside the conventional industrial design and production, is essential. The emerging problem of the sustainability of industrial systems and their ecological transition is pushing for the further development of existing technologies. To this end, a conceptual framework becomes necessary for the development of theories and methods (e.g., process analysis, safe operations) for sustainable industrial design and production and their implementation in the supply chains of manufacturing products, with particular attention to their impact on environment, society and the economy.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
