

Special Issue

Infrastructure and Tourism: A Social Sustainability Perspective

Message from the Guest Editors

This Special Issue specifically spotlights the connections between infrastructure, social sustainability, and tourism. These can include topics such as age-friendly tourism transport services and facilities; user conflicts in transport networks; competition between tourism and low-carbon, renewable, or clean energy developments; disputes over water supply and usage in tourism destinations; food and local supply chain resilience in tourism regions; and disaster management and infrastructural recovery in destinations. Infrastructure development faces several challenges, including funding constraints, inadequate maintenance, and the need for technological advancements. Additionally, the growing demands of urbanization, demographic shifts, and climate change require innovative and sustainable infrastructure solutions. We are particularly interested in receiving contributions to this Special Issue focused on digitalization, smart technologies, and renewable energy sources and how these can optimize infrastructure management, improve efficiency, and enhance equitable user experiences for all.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
