Special Issue

Pathways to Clean Energy: Technologies, Policies, and Impacts

Message from the Guest Editors

The transition to clean energy serves as a fundamental pillar for achieving global sustainability objectives, addressing climate change, and securing energy security and stability. Currently, the energy sector faces a decisive turning point. According to International Energy Agency (IEA) projections, reaching net-zero emissions by 2050 necessitates a more than threefold increase in annual global clean energy investments, reaching approximately USD 4 trillion by 2030. This unprecedented economic transformation introduces both complex challenges and significant opportunities that warrant rigorous economic analysis. This Special Issue seeks to advance our understanding of clean energy pathways by examining the interplay between technological innovation, policy frameworks, and societal impacts. This Special Issue aims to move beyond isolated perspectives and contribute to more holistic frameworks for analysing and accelerating clean energy transitions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
