

Special Issue

Sustainable Animal Production and Livestock Practices

Message from the Guest Editor

Animal production faces global challenges due to the food crisis, rising input prices, the climate crisis, the post-pandemic effects of the COVID-19 and wars and conflicts. All of these issues impact producers and increase global food costs. In addition to these challenges, there is one that cuts across the rest: sustainability. This Special Issue welcomes review articles and research papers that address advanced and innovative solutions promoting sustainable animal meat production. Research topics may include (but are not limited to) the following: -Strategies of sustainable livestock;
-Animal welfare and sustainability;
-Strategies for the mitigation of gas emissions from livestock;
-Livestock and conservation grazing;
-Regenerative practices in livestock production;
-Strategies of sustainability in patrimonial animal production;
-Carbon balance in livestock;
-Integration of agroforestry and livestock;
-Strategies of the circular economy in livestock;
-Agroecological livestock production;
-Strategies to add value to grass-fed products. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
