

Special Issue

Building Resilience and Sustainable Societies: The Intersection of Digital Technologies, Cyber Resilience, and Sustainable Development

Message from the Guest Editors

This Special Issue aims to explore the pivotal role digital technologies play in driving both resilience and sustainability within societal transformation processes. As societies undergo digital transformation, digital technologies serve as fundamental enablers, facilitating innovative solutions to address evolving challenges such as cybersecurity threats, digital disruptions, and sustainability concerns. In this context, resilience and sustainability emerge as two equally important objectives to be prioritized throughout the transformation journey. We invite contributions that investigate various aspects of leveraging digital technologies to build resilient and sustainable societies. Academic researchers and industry practitioners are invited to submit original research papers and systematic mapping and review papers on relevant topics, including:

- cyber resilience
- sustainable development
- digital transformation
- digital technology
- sustainable economic models
- ESG (environmental, social, and governance)
- cyber resilience for small and medium-sized companies

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
