Special Issue

Digital Ecosystem and Sustainable Entrepreneurship: Opportunities and Challenges

Message from the Guest Editors

The digital revolution is transforming every aspect of our society, creating new opportunities for entrepreneurs to drive sustainable economic, social, and environmental impact. The digital ecosystem, characterized by interconnected networks of digital technologies, platforms, and stakeholders, has a pivotal role in fostering innovation and sustainable business practices. This Special Issue will usefully supplement the existing literature by bridging critical gaps between technological innovation and sustainable business practices. By focusing on how digital platforms, emerging technologies, collaborative networks, and information security can drive sustainable entrepreneurship, this Special Issue will provide a holistic perspective that enriches the theoretical and practical understanding of these fields. Moreover, the inclusion of case studies and best practices will offer actionable insights and empirical evidence, facilitating the translation of academic research into real-world applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA
